Agricultural and Forest Meteorology, 65 (1993) 281–282
Elsevier Science Publishers B.V., Amsterdam

Contents of Volume 65, 1993

VOL. 65, NOS. 1–2 JUNE 1993

Research Papers

Effect of ground cover, rain intensity and strawberry plants on splash of simulated raindrops
X. Yang and L.V. Madden 1

A multiple-source land surface energy balance model for use in general circulation models
A.J. Dolman 21

Analysis and performance of a greenhouse with water filled passive solar sleeves
G.N. Mavrogianopoulos and S. Kyritsis 47

A prediciton model for field drying of hay using a heat balance method
A. Tuzet, A. Perrier and A.K. Oulid Aissa 63

Modelling grapevine phenology against weather: considerations based on a large data set
G. Due, M. Morris, S. Pattison and B.G. Coombe 91

Long-term study of solar radiation regimes in a tropical wet forest using quantum sensors and hemispherical photography
P.M. Rich, D.B. Clark, D.A. Clark and S.F. Oberbauer 107

A climatological study of injury to citrus trees from freezing weather in China
S. Huang, G. Li, C. Zhou, X. Fan and C. Shen 129

Book Reviews

History of the Commission for Agricultural Meteorology
J. Monteith 139

Climate, Earth Processes and Earth History
R.E. Dickinson 142

Climates of the World
P.J. Croft 143

VOL. 65, NOS. 3–4 AUGUST 1993

Research Papers

A simple greenhouse climate control model incorporating effects of ventilation and evaporative cooling
T. Boulard and A. Baille 145

Use of microlysimeters to measure evaporation from sandy soils
C.C. Daamen, L.P. Simmonds, J.S. Wallace, K.B. Laryea and M.V.K. Sivakumar 159

Transpiration from an Amazonian rainforest calcuated from stomatal conductance measurements
J. Robers, O.M.R. Cabral, G. Fisch, L.C.B. Molion, C.J. Moore and W.J. Shuttleworth . . 175

Heat units, solar radiation and daylength as pepper harvest predictors
K.B. Perry, D.C. Sanders, D.M. Granberry, J.T. Garrett, D.R. Decoteau, R.T. Nagata, R.J. Dufault, K.D. Batal and W.J. McLaurin 197

Evaluation of structure description requirements for predicting gap fraction of vegetation canopies
B. Andrieu and H. Sinoquet 207

Transpiration of *Ficus benjamina*: comparison of mesurements with predicitons of the Penman–Monteith model and a simplified version
B.J. Bailey, J.I. Montero, C. Biel, D.J. Wilkinson, A. Anton and O. Jolliet 229
Measurement of gap fraction of fractal generated canopies using digitalized image analysis
S.G. Chen, I. Impens, R. Ceulemans and F. Kockelbergh 245
Gap frequency and canopy architecture of sugar beet and wheat crops
F. Baret, B. Andrieu and M.D. Steven 261
